

Illuminating ideas for building facades

# Trespa Perspectives Character

TRESPA®

**Let your  
creativity flow,  
think Trespa**

Light creates an atmosphere and sets accents. It gives shape to shadows, and motion to spaces and surfaces.

# A waterfall of brightness

Playing with light and its effects. A waterfall of ideas. With an innovative, distinct identity as the result.

Light can lift surfaces out of their anonymity and give buildings an exciting appeal. Subdued and chic or lavishly bathed in light.

## Senso

# Light up your design

# tional curves

Experience how lighting can make a difference like day and night. A breath-taking design is replaced by its counter-image at night.

# Character

## Illuminating ideas for building facades

---

Trespa Perspectives gives architects an inspiring view of the future. A source of ideas, new techniques, colors and shapes. Themes like Character, Rhythm and Depth give new impulses to facade design. Now Trespa has introduced the use of light to add a further dimension to the Character theme. What was invisible is brought to the fore, straight lines become curves and colors undergo a true metamorphosis. By illuminating the facade's panels or joints by means of the latest LED technology, which does not place an unfair burden on the environment or your budget, your design is guided into the night where it will take on a surprising and distinct identity. Just like Trespa it is sustainable, cost-effective and maintenance-friendly.

## Inspiration comes to life

Unique and expressive eye-catching facades all over the world prove the strength of Perspectives. A wealth of ideas in a panel with exceptional qualities. Trespa is colorfast and impact resistant, ensuring that your design will remain the way you intended for many years to come. Sustainability and durability in combination with a responsible approach to environmental and economic aspects. Be inspired as well.
