TRESPA®

TRESPA®

Inspiration is endless and timeless. The colors, shapes and patterns of the world around us provide the inspiration for the creation of new and exciting architectural concepts.

# The perfect balance

This concept provides strong support without ever being predictable. Combine aspects of power and vulnerability.

# Surprising connections

There is no right direction. This concept shows different directions all at once. Nothing is ever as straightforward as it seems – and there are many ways to achieve the unexpected.

# Beyond the surface

Highlight forms that are created by omitting the expected. This concept enables you to draw attention and give shape to the empty space that is left behind.

# Added space

The surface may be only skin-deep, it usually hides what lies beneath. Not so in this concept, where we show – or hint at – the layers beyond. Beauty is more than skin-deep.

# Rhythm

## Panels as a decorative skin

If you are looking to create unique and highly individual facades, think Trespa.

Trespa Meteor panels can be used to create a decorative skin that makes your building stand out. Pictured here in this brochure are examples of concepts, where Trespa panels are used to create extra skins and sunblinds that envelop buildings to change and enhance their overall appearance.

These concepts are part of Trespa Perspectives, the inspirational source of new ideas for architects, designers and specifiers, comprising different architectural elements based on the themes of Rhythm, Depth and Character.

# Inspiration comes to life

Trespa International produces a range of panels with exceptional qualities that allow you to create expressive and eye-catching facades. Trespa Meteor is a unique material: colorfast and impact resistant, so your design will remain the way you intended for many years. Trespa offers sustainability and durability in combination with a responsible approach to environmental and economic aspects. Come and be inspired: <http://perspectives.trespa.com>

The designs shown in this brochure are for inspiration only and have not been submitted to specific tests. Actual designs may vary, depending on specific location, regulations and circumstances. Design and fixing systems may influence possible end results. Trespa continually strives to meet and exceed local and national building regulations, however, please always check your local technical building regulations for the acceptance of design requirements.
